

Warranty

For (90) days from date of manufacture, your GAMON COOLER warranty covers all parts and labor to repair or replace any sealed system components that prove to be defective in materials or workmanship. The sealed system consists of the compressor, condenser, evaporator, drier and all connecting tubing. The warranty also covers all parts and labor to repair or replace any part of the entire unit that proves to be defective in material or workmanship.

All service provided by GAMON under the above warranty must be performed by GAMON authorized service representatives. GAMON, at its option, may choose to replace any unit that fails during the warranty period.

The warranty applies only to products installed in the Continental United States. This warranty does not cover any parts, labor or defect caused by negligence, accident or improper use, maintenance, modification, installation service or repair, including but not limited to improper removal and reinstallation of shelving or condensing unit.

This remedy of repair or replacement provided for herein is exclusive as to this warranty and as to any warranty that may arise by operation of law. GAMON shall not be responsible for any consequential or incidental damages arising from the breach of this or any other warranty, whether expressed, implied or statutory.

Prior to repairing any material (part or unit) a Repair of Material Authorization (RMA number) must be obtained. To obtain this authorization, provide the reason for repair with serial number. Either call the Hotline (1-800-445-7710) or write GAMON's Parts/Service Department prior to work being performed.

GAMON International will not honor or assume any responsibility for any expenses (including labor) incurred in the field for repair of equipment covered in our warranty unless an RMA number has been granted from GAMON's Service Department prior to work being performed.
